

Appendix: Photographic records with evidence of feeding activities of the Rufous-tailed Jacamar (*Galbula ruficauda*) obtained by citizen scientists in the Caatinga and close portions of the Cerrado and the Atlantic Forest, Brazil, between 2007 and 2021, with information on the location, date and period of records, and the Order of the captured insects. Code: (WA) WikiAves, (S) eBird. Ecosystem: AF (Atlantic Forest), (CA) Caatinga, (CE) Cerrado. Order: "n.i." means that it was not possible to identify the Order of the captured insect. Records were gathered in the WikiAves and eBird databases by FMOC in February 2021. Records were listed by ecosystem, by period, by Order, and then randomly.
