Abstract

Now, when a lot of talking is going on about legalizing marihuana, I think I need to share the results of my measurements with the world. I measured students before and after smoking marihuana with my supersensitive patented equipment and I found that the energy of the upper spinning energy centers of their nonlinear electromagnetic field (NEMF), which rules and regulates everything in the body and is emotionally sensitive, is almost sucked out after smoking marihuana. This is a dangerous situation and based on this I think marihuana should remain illegal.

Keywords: Marihuana; Measuring The Effect Of Marihuana; Marihuana Should Remain Illegal

Introduction

In a previous article I wrote about scientific studies showing the advantages of the natural remedies. However, please do not fool yourself that all natural remedies are OK [1]. Thirty years ago, a colleague-professor of mine, Evelyn Sharp, started at the University of Tennessee, Knoxville, a students' group named Spiritual Enlightenment. Most of the students attending the group were smoking marihuana thinking that being a natural substance it is OK to use it to get high and they thought wrongly that marihuana is helping them to become spiritually high fast. What an illusion! Even thirty years ago, when this group existed, I knew intuitively that this couldn't be true.

Now, I have the scientific proof that this is not true. I have patented supersensitive equipment that allows me to measure the weak human nonlinear electromagnetic field (NEMF), which rules and regulates everything in the body being 1,000 times weaker than the body biocurrents [2]. It does this on information basis. My electronic equipment [2] allows me to measure the vortices and anti-vortices of the human nonlinear electromagnetic field (NEMF). They are spinning energy centers located

along the backbone, which rule and regulate the endocrinal glands (Figure 1). For more than 30 years I have been measuring these spinning energy centers.

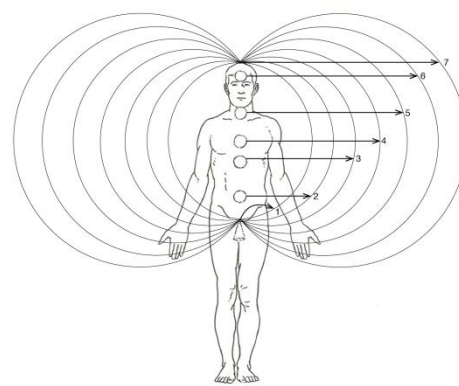

Figure 1: The 6+1 spinning energy centers and their discrete energy levels.

With this equipment, I measured student's NEMF after smocking marihuana. I found that after smoking

marihuana the energy of their upper spinning energy centers was almost sucked out. What I observed was disturbing. Now, when a lot of talking is going on about legalizing marihuana, I think I need to share the results of my measurements with the world [2].

Are We Really Body and NEMF (Spirit)?

We are a material body and weak nonlinear electromagnetic field (NEMF), located in the Subconscious, where we have a powerful Quantum computer operating with the waves of this NEMF. From the Subconscious this Quantum Computer rules and regulates everything in the body [3]. From hypnosis, which put the Conscious to sleep and allows access to the Subconscious [3] we know that the Quantum computer of the Subconscious is operating 10,000 times faster than the Digital computer of our Conscious and has almost unlimited storage capacity.

The only problem is - we don't have voluntary access to the Subconscious and the powerful Quantum computer. However, since our emotional brain is in the Subconscious, our Subconscious and the Quantum computer in it could be approached and accessed with "watering with emotions" and this is the basis of our intuitive creativity and intuition [4,5].

Measuring the Spinning Energy Centers of our NEMF (Spirit)

Our NEMF has 6 spinning energy centers (Figure 1), which rule and regulate the 6 endocrinal glands. They are called "chakras" in the Indian literature, which mean "spinning wheels" in Sanskrit. The seventh spinning energy center on top of the head is the Chinese point Bai Hui (Point of Union) [6], which integrates the energies of the six energy centers lying under it. The six centers are divided into 3 couples:

Body's Spinning Energy Centers (Body's Chakras)

They are the lowest two spinning centers - #1 at the tailbone and #2 on top of it (Figure 1). While the first spinning energy center (#1) rules and regulates our instincts for survival, the second spinning energy center (#2) rules and regulates our sexual instincts to repopulate.

Spirit's Spinning Energy Centers (Spirit's Chakras)

They are the top two spinning energy centers of our NEMF. These are the top two spinning energy centers #5 of the throat and #6 of the forehead. While the fifth

spinning energy center (#5) rules and regulates our communication (verbal and nonverbal), the sixth spinning energy center (#6) is the center of our intuition. Since our intuition is a product of our Quantum computer located in the Subconscious, this is an additional proof that the spinning energy center #6 of intuition belongs to the Spirit - the NEMF, whose waves are the basis of our Quantum computer. The spinning energy center #5 is the center of communication (verbal and nonverbal). Since the nonverbal (telepathic) connection is done with the waves of our NEMF, this is an additional proof that the spinning energy center (#5) of communication belongs to the Spirit, i.e. the weak NEMF, whose waves are the basis of our Quantum computer.

Soul's Spinning Energy Centers (Soul's Chakras)

Soul is the unity of body and Spirit. Its energy centers are: the spinning energy center of the Solar Plexus (#3), which rules and regulates the functioning of all body's internal organs, but the heart and the spinning energy center of the Heart (#4), which rules and regulates the body's Heart (Figure 1).

Since our Subconscious houses the emotional brain and the Subconscious rules and regulates the functioning of all organs, the unity of body and Spirit makes the functioning of all organs emotionally dependent. Our digestive system is emotionally sensitive (frequently when we get upset, our stomachs get upset) and so is our Heart (and to a lesser degree the other organs) [7].

Thus, the first two spinning energy centers (#1 and #2) belong to the body and the top two spinning energy centers (#5 and #6) belong to the Spirit (our NEMF, which operates from the Subconscious). The spinning energy centers between them (#3 and #4) belong to both body and Spirit, whose unity we call Soul. From here comes the name Soul's spinning energy centers for #3 and #4.

After somebody smokes marihuana, all four spinning energy centers (#3, #4, #5, and #6) related to the Spirit (our NEMF) read very low energy. As if the marihuana has almost sucked out the energy of all spinning energy centers related to the Spirit. And this is a very dangerous situation.

Conclusion

If marihuana sucks out the energy from all spinning energy centers related to our NEMF, called Spirit, which rules and regulates everything in the body from the

Subconscious, marihuana should remain illegal. Thanks for your attention.
