## Editorial

In psychiatry, one millionth of a gram LSD is used for early diagnosis of schizophrenia. This extremely small amount wouldn't influence anybody, but the people with predisposition to develop schizophrenia. When asked to draw a window, they cannot connect the lines at the corners. These people will develop schizophrenia under stress, or under the influence of narcotic drugs, such as LSD, or marihuana, or any other narcotic drug.

In article [1], I said that marihuana should remain illegal based on measurements with my sensitive patented equipment, with which I can measure the human weak informational NEMF, which is 1,000 times weaker than the biocurrents of the body. Toward the end of my article [1], I emphasized that my measurements showed that after smoking marihuana almost all the energy from the upper four spinning energy centers of the body has been sucked out. Only 20% of the energy was left.

I finished the article with the words that this is a very dangerous situation. In the present article, I am going to explain why. I explained in [1] that there are six spinning energy centers along the backbone, which rule and regulate the six endocrine glands. The upper two spinning energy centers belong to the Spirit, the lower two – to the body, and the middle two to the unity of body and Spirit called Soul. Thus, my measurements show that after smoking marihuana the Spirit is almost not there because only 20% of the energy of the upper 4 spinning energy centers is left).

This is an invitation for negative Spirits to jump in. When this happens, the person has bipolar personality or suffers bipolar disorder, which manifests as periodic drastic changes in moods from euphoric and positive to depressed and negative depending on which Spirit dominates – the positive

or the negative. In the US this is called mental disorder, which is not right. In Bulgaria this is called disease of the Soul, and this is the right name for it. It is emotional disorder and emotions come with the Spirit, while Soul is the unity of body and Spirit.

Why are people attracted to marihuana and other narcotic drugs? It is because the narcotic drugs make them less emotional. We are here on Earth-Spirits in material body-to learn to control our emotions, which come with the Spirit (NEMF) and to learn to suppress our ego, which comes from the instincts of survival of our material body [2]. So, the people on narcotic drugs are escapists -instead of learning to control their emotions, they are taking narcotic drugs to suppress their emotions.

Proof that emotions come with the Spirit is the fact that both the Emotional Brain and the Quantum Computer, which works with the waves of the Spirit [3], are in the Subconscious. For that reason, we are not consciously aware of the presence of a Quantum Computer in our Subconscious. Hypnotists, who put the Conscious to sleep to access the Subconscious, discovered with surprise that the people with sleeping Conscious could calculate 10,000 times faster. This speaks of the presence of Super-Computer in our Subconscious.

To the Subconscious are subordinated all our organs. It is deliberately done so, because in a case of danger, when we are mobilized for response, we are not supposed to be bothered with information about the functioning of our organs. On the other hand, all organs are holographically represented on the surface of the skin: on the palms, on the feet, on the ears, and on the irises of the eyes. Since holographic images are created with lasers (waves), the holographic representation of our organs means that waves rule and regulate the functioning

of our organs.

If so, our Subconscious rules and regulates our organs with waves. Waves could explain the very high rate of computation of the Super-Computer in our Subconscious and since holographic record (record with waves) is very compact, expect enormous memory-storage capacity. All this means that in our Subconscious operate Quantum Computer [4], which rules and regulates the functioning of our organs and the whole our body; it operates with the waves of our NEMF (Spirit), has enormous memory storage, and calculates 10,000 times faster than our Conscious Computer, which operates on biochemical principle.

Now, let's go back to marihuana problem. The drug users use marihuana to decrease their emotionality, but this decreases the power of their Spirit and disable their Quantum Computer, which works with the waves of the Spirit. The decreased emotionality of the marihuana users makes them less humans, because what makes us humans is our creativity, which is watered with emotions and grows with emotions.

Narcotic users should always consider the fact that narcotic drugs could trigger bipolar disorder. Even if only the people with genetic predisposition would develop mental disorder, to avoid developing mental disorder stay away from narcotic drugs like marihuana or any other narcotic drug. Keep also in mind that the presently offered "solution"

for bipolar disorder is not a solution at all. I measured what the drugs for bipolar disorder do. They trim down the energy of both Spirits-the positive and negative.

This decreases the amplitude of change from manic to depressive, but leaves these people with such low energy, that they are completely disabled. Then the government give them disability money, which is such small amount that they have a heavy choice to make-to have roof but to be hungry, or to have food but not roof. Everybody should consider this before starting the use of narcotic drugs including marihuana. Considering the fact that marihuana could trigger mental diseases, like bipolar disorder, I think marihuana should remain illegal.
