Editorial

Sexual dysfunction can affect man and women and it is common symptom nowadays. The most common presentation of sexual dysfunction in man is premature ejaculation and regarding it is common appearance, it is normally underdiagnosed and under treatment [1]. The majority of emotional and physical symptoms presented by each patient has in the back ground energy alterations that are usually invisible by the naked eyes [2,3].

I have been studying our human's energy pattern since 2010 and at that time, only one or two organs responsible for the formation of the disease would be compromised by the lack of internal energy, represented by the lack of movement by the pendulum used in a radiesthesia exam [4,5].

However, in research that I did in my clinic in Brazil, analyzing a 1000 patients chakras' energy centers, which corresponds to the five internal massive organs of the five elements theory of traditional Chinese medicine, 90% of them were in the lowest level of energy in these five internal massive organs, rated one out of eight. This research was done from 2015 to 2020 before the COVID-19 pandemic [4,5]. If we analyses the energy of them today in 2023, 100% would be in the lowest level of energy, independently on the type of diagnosis or the age group [6].

In a presentation that I did in the Acupuncture Research Conference that was held in 2015 in Harvard Medical Scholl in Boston, I said that if we treat the energy imbalances of the patient (that corresponds to *Yin*, *Yang*, *Qi* and Blood), we can

treat all the patients' conditions at the same time even the doctor does not know that the patient has such symptoms [7,8].

Each internal five massive organs are responsible for the production of internal energy to our survive. For example, Blood is produced by the Spleen and pancreas, *Yin* and *Yang* is produced by the Kidney. *Qi* is distributed by the Lungs and Liver and the Heart is responsible for controlling the Blood flow inside the Blood vessels [9,10].

The Kidney is responsible for sexual functions and the laboratory exams normally to evaluate the functions of the Kidney cannot see the part of energy which is compromised in patients with erectile dysfunction [2,11]. In another research in my clinic made in 2021, I concluded that 97,5% of all my patients do not have energy in the Kidney and this result could compromise all functions controlled by the Kidney, such our youth, teeth, bones, hearing process, youth, reproduction and sexual functions [2,3].

In many other articles written by myself (2022) such as *Myocardial Infarction without Arterial Obstruction in Patient Post COVID-19 Treatment*. I am showing that due to this energy deficiency pattern, the population is very weak in energy in any type of internal massive organs and the Blood to flow inside the human body, needs energy showed in this article [12-14].

The use of any kind of highly concentrated medications

could reduce even more this energy and could induce stagnation of Blood inside the blood vessels of any part as shown in Arndt-Shultz Law, created in 1888 by two German researchers. If the Blood stagnates in the Heart circulation, it would cause myocardial infarction. If the Blood stagnates in central nervous system, it would cause cerebral vascular accident. If Blood stagnates in the lower limbs, it would cause venous or arterial thrombosis [9,15-18].

So, in this article, I would like to demonstrate that patients with some kind of sexual dysfunction, this is caused by energy deficiency inside the five internal massive organs of the five elements theory of traditional Chinese medicine, responsible for our health and for the normal functions of internal organs, in this case, it is related to the Kidney. To treat the Kidney, we need to treat the whole system, because the Kidney depends on the energy of the Lungs and the Lungs depends on the energy of the Spleen. The Spleen depends on the energy of the Heart, which depends on the energy of the Liver [2,7,19].

If we treat only the Kidney, the patient would not be treated adequately because the organ that sends energy to the Kidney is the Lungs, that it is very weak in energy also. The Spleen and pancreas are another energy very compromised and if we do not treat this energy deficiency situation, the patient would not improve the condition because the Spleen is important to send the energy to the Lungs. It is also occurring energy deficiency in the Heart and also, to the Liver [19,20].

So, the entire system needs to be treated because all organs are interconnected and one depends on the energy of the other. The treatment using highly diluted medications such as homeopathy medications according to the theory of *Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine* is of paramount importance to treat this kinds of patients because it would increase the vital energy. If we use highly concentrated medications in these patients to increase the sexual functions, the energy of the patient will reduce even more and can increase the chance to have any kind of complications or even death, as shown in Arndt-Schultz Law [2,7,18,21, 22].
